Daihatsu Hijet Engine

The first vehicle to bear the name Hijet from Daihatsu was a kei truck in November 1960, with the enclosed light van model following in May 1961. The first generation Hijet used a conventional front engine, rear-wheel-drive format with the driver sitting behind the engine, in a similar pickup fashion.

Daihatsu Hijet - Wikipedia

There are many components in the Daihatsu Hijet engine. The engine valves are what lets the fuel travel from the carburetor to the combustion chamber. The Intake Valve lets fuel in, and the Exhaust Valve lets the burnt fuel or exhaust leave the combustion chamber. The pistons have piston rings fitted to allow the engine to build compression.

Engine
