motion a push or a pull force had to move it along. Forces can be created by many of different ways. There are commonly thought to six different types of forces including gravity, friction, elastic, electromagnetic, nuclear, and tension.

Force and Motion Worksheets - easyteacherworksheets.com

Kinematic equations relate the variables of motion to one another. Each equation contains four variables. The variables include acceleration (a), time (t), displacement (d), final velocity (v_f), and initial velocity (v_i). If values of three variables are known, then the others can be calculated using the equations. This page demonstrates the process with 20 sample problems and accompanying ...
