A chord voicing is just a way of altering the order of and intervals between the notes in a chord. So instead of playing CMaj7 as a block chord (C E G B) we could reorder the notes and play C B E G - which spans two octaves (called 'open harmony'). This is considered more sophisticated and 'jazzy'. While there is a place for block chords in Jazz (see the Locked Hands lesson), by and large Jazz uses more elaborate voicing techniques such as:

It is common for jazz-style piano voicings to contain additional tensions along with the basic chord tones. The following example shows available tensions placed above the basic chord sound. G # on F # -7(9) and G # on B7(13) are available as tensions on these individual chords, though they are not diatonic to the key, C major. Be sure to include nondiatonic tensions in the chord symbol.
