5.1 MIXER ORIENTATION How the mixer is oriented determines the type of mixing produced. Blending Installation Note: Mixer needs to be installed at 10-15 degrees from vertical and towards center of tank. This will force fluid movement from bottom to top of tank. If vortexing (fluid funneling) appears, shift angle of mixer towards side wall.

The FS Series Dual and Triple Auger mixers are all-purpose mixers suitable for all types of operations. They features a full frame and 4-point scale system, front, side or rear discharge with a wide array of conveyor, tire and axle options. All multi-auger mixers feature a step floor design and overlapping augers, producing an even front to back mix and a rapid and complete cleanout.

### **Vertical Mixers | NDEco**

Vertical feed mixers are equipped with blades that tear and cut hay bales and roughage into particles while mixing. Vertical feed mixers are typically used on dairy and beef farms. Vertical mixers provide a very thorough mix for any beef or dairy ration. Sometimes a special auger needs to be an option depending on the ration make up.
