There is an increasing emphasis on, and commitment to, using patient narratives in nursing practice and nurse education. Listening to the voices of those receiving our care is just the beginning. The challenge is to use these narratives to improve practice and the patient experience. This seven-part series will present narratives from three fields of nursing: adult, mental

5.1. Self Narratives. Crucial to mental health nursing is the self/life narrative. It has been posited that in a very substantive way we are our stories . Frank says that stories “contain” the self . Stories reveal aspects of the self in the context of one’s history and the likely future trajectory.
