## **Intellectual disability**

Mental retardation is an impairment of a person's intelligence and adaptive behaviors. A developmental delay is a delay in functioning for a person's age. Both conditions involve social maturity, physical and emotional development, and cognitive abilities. They also differ in how they are diagnosed and how they are treated.

## **What Is the Difference between Developmental Delay and ...**

Mental retardation can also be the result of extreme lack of oxygen near the time of birth. Mental retardation may develop in an older child as the result of serious head injury, stroke, or infections such as meningitis. Developmental tests are often used to assess the child with intellectual disability:
